Subject Index

Acetylcholine, 104
Aging, 24
Alzheimer's disease, 19, 121
Anoxia, 35
Anticytotoxic substances, 137
Anti-NGF antibodies, 119
Angiographic study, 137

Barbiturates, 131
Basal ganglia, 30
Brain,
  -damage, 15
  -ischemia, 125
  -weight, 106

C-fos induction, 111
Calcium,
  -accumulation, 32, 80
  -channels, 70
  -entry blockers, 33, 137
  -influx, 111
Cell culture, 67, 115
Cerebral,
  -blood flow, 125, 137
  -tissue damage, 137
Cerebrovascular insufficiency, 111
7-chlorokynurenic acid, 40
Cholineacetyltransferase, 119
Choline uptake, 105
Cholinergic neurons, 119
Citidinphosphocoline (CDP-choline), 141
Clinical trials, 137
CNQX, 73
Cortical electric activity, 114
Critical perfusion, 137
Cytotoxic free radicals, 45, 140

Degree of neurological improvement (DNI), 115
2-Deoxglucose autoradiography, 82
Diacylglycerol, 2, 57
Domoate dementia, 25
Domoic acid, 15
Dopamine, 104
  -uptake, 105

Edema, 33
Embolic stroke, 142
Excitatory aminoacid, 35, 45, 57, 67, 81, 111
  -neurotoxicity, 113
  -receptor, 15
  -release, 47
Excitotoxic, 15, 81
  -cell death, 18
Electrocorticogram, 117

Fibrinolytic treatment, 137
Four vessel occlusion model, 112

Gangliosides, 95
  -derivatives, 33, 99, 106, 111, 137
GAP 43, 2
Gerbil, 37, 45
Glicine, 39
  -antagonists, 82
  -receptors, 39
Glutamic acid, 15, 35, 45, 140
  -metabolotrophic receptors, 57
G-proteins, 61

HA-966, 40
Head injury, 125
Hemodilution, 137
Hippocampus, 5, 81, 105, 113, 118
Huntington's disease, 124
Hypoglycaemia, 35
Hypoxia, 18, 103

Inositol phospholipid hydrolysis, 58, 111
Intracranial arterial occlusion, 142
Ionic derangements, 33
Ischemia, 1, 15, 30, 45, 111, 125
-cell dealth, 80
-focal, 38, 82, 112
-global, 37, 57, 81, 112
-penumbra, 138
-perinatal, 20
-stroke, 137

K^+-evoked currents, 68
Kainic acid, 15, 67
-toxicity, 17
Ketamine, 82

Longterm potentiation (LTP), 2, 61

MCA occlusion, 30, 82
Mechanical hyperventilation, 130
Memory formation, 2

Na accumulation, 31
Na/K ATPase, 112
Naloxone, 137
Nerve growth factor (NGF), 115, 119
-receptor mRNA, 121
Neurite growth, 2
Neurodegenerative diseases, 18
Neuroendocrinopathies, 24
Neuronal
-degeneration, 112, 140
-plasticity, 58
Neuronotrophic factors, 115
Neuroprotection, 36
Neurotoxins, 15, 36, 111
N-methyl-D-aspartate (NMDA), 15, 45, 67, 114
-antagonists, 35, 73, 81, 82
-receptors, 2, 19, 35, 57, 81
-toxicity, 17
Norepinephrine, 104

Osmotic diuretics, 131

Patch clamp technique, 68
Pertussis toxin, 61
Phorbol esters, 2
Phorbol receptor, 4
Phospholipases, 57
Phospholipase C hydrolysis, 2
Protein kinase C (PKC), 2, 58, 111
-activation, 2
-inhibitors, 5
-translocation, 4
Protein F1, 2
-phosphorilation, 3
Prostacyclin, 137

Quisqualic acid, 67

Receptor abuse-dependent antagonists (RADA), 112

Septal complex, 119
Serotonin, 104
Siagoside, 111
Sphingolipids, 99
Steroids, 131
Strychnine-insensitive receptors, 39
Strychnine-sensitive receptors, 39
Sulfite oxidate deficiency, 23
Synaptic plasticity, 2

Voltage-gated calcium channels, 70
